

Certified Information Privacy Manager (CIPM)

- **Formato do curso:** Presencial e Live Training
- **Localidade:** Lisboa
- **Data:** 09 Out. 2019 a 10 Out. 2019
- **Preço:** 1900€
- **Horário:** Laboral - das 09h00 às 17h00
- **Duração:** 14 horas

This course is the how-to training on implementing a privacy program framework, managing the privacy program operational lifecycle and structuring a knowledgeable, high-performing privacy team. Those taking this course will learn the skills to manage privacy in an organization through process and technology—regardless of jurisdiction or industry.

The CIPM is the world's first and only certification in privacy programme management. When you earn a CIPM, it shows that you know how to make a privacy programme work for your organisation. In other words, you're the go-to person for day-to-day operations when it comes to data protection.

The CIPM program was developed by the International Association of Privacy Professionals (IAPP), which is the world's largest comprehensive global information privacy community and resource. The CIPM certification also holds accreditation under ISO 17024: 2012.

This training is a robust, interactive opportunity to learn about critical privacy concepts that are also integral to the CIPM exam. While not purely a "test prep" course, this training is appropriate for professionals who plan to certify, as well for those who want to deepen their privacy knowledge. Both the training and the exam are based on the same body of knowledge.

Are you GDPR Ready?

There's a lot to know, there's a lot at stake and there's a lot of opportunity for data protection professionals with the right training and education.

Achieving a CIPM credential shows that you have a practical and comprehensive knowledge of how data protection programmes should work across an organization.

Also included:

- Certification Exam
- IAPP 1-year membership (further details on membership [here](#))

Destinatários

- Data Protection Officers
- Data Protection Managers
- Auditors
- Legal Compliance Officers
- Security Manager
- Information Managers
- Anyone involved with data protection processes and programmes

Programa

Introduction to privacy program management

Identifies privacy program management responsibilities, and describes the role of accountability in privacy program management.

Privacy governance

Examines considerations for developing and implementing a privacy program, including the position of the privacy function within the organization, role of the DPO, program scope and charter, privacy strategy, support and ongoing involvement of key functions and privacy frameworks.

Applicable laws and regulations

Discusses the regulatory environment, common elements across jurisdictions and strategies for aligning compliance with organizational strategy.

Data assessments

Relates practical processes for creating and using data inventories/maps, gap analyses, privacy assessments, privacy impact assessments/data protection impact assessments and vendor assessments.

Policies

Describes common types of privacy-related policies, outlines components and offers strategies for implementation.

Data subject rights

Discusses operational considerations for communicating and ensuring data subject rights, including privacy notice, choice and consent, access and rectification, data portability, and erasure.

Training and awareness

Outlines strategies for developing and implementing privacy training and awareness programs.

Protecting personal information

Examines a holistic approach to protecting personal information through privacy by design.

Data breach incident plans

Provides guidance on planning for and responding to a data security incident or breach.

Measuring, monitoring and auditing program performance

Relates common practices for monitoring, measuring, analyzing and auditing privacy program performance.
