

Certified Information Privacy Professional/Europe + Certified Information Privacy Manager (CIPP/E + CIPM)

- **Formato do curso:** Presencial e Live Training
- **Localidade:** Lisboa
- **Data:** 01 Jul. 2019 a 04 Jul. 2019
- **Preço:** 2750€
- **Horário:** Laboral - das 09h00 às 17h00
- **Duração:** 28 horas

Are you GDPR Ready?

There's a lot to know, there's a lot at stake and there's a lot of opportunity for data protection professionals with the right training and education.

The **CIPP/E** training covers essential pan-European laws and regulations, as well as industry-standard best practices for corporate compliance. Those taking this course will gain an understanding of the European model for privacy enforcement, key privacy terminology and practical concepts concerning the protection of personal data and trans-border data flows. Achieving a CIPP/E credential shows you have the comprehensive GDPR knowledge, perspective and understanding to ensure compliance and data protection success in Europe—and to take advantage of the career opportunity this sweeping legislation represents.

The **CIPM** course is the how-to training on implementing a privacy program framework, managing the privacy program operational lifecycle and structuring a knowledgeable, high-performing privacy team. Those taking this course will learn the skills to manage privacy in an organization through process and technology—regardless of jurisdiction or industry. The CIPM is the world's first and only certification in privacy programme management. When you earn a CIPM, it shows that you know how to make a privacy programme work for your organisation. In other words, you're the go-to person for day-to-day operations when it comes to data protection.

Both CIPP/E and CIPM programs were developed by the International Association of Privacy Professionals (IAPP), which is the world's largest comprehensive global information privacy community and resource. Both CIPP/E and CIPM certifications hold accreditation under ISO 17024: 2012.

Also included:

- Certification Exams

- IAPP 1-year membership (further details on membership [here](#))
-

Destinatários

- Data Protection Officers
 - Data Protection Lawyers
 - Records Managers
 - Information Officers
 - Compliance Officers
 - Human Resource Officers
 - Anyone who uses, processes and maintains personal data
-

Programa

Data protection laws

Introduces key European data protection laws and regulatory bodies, describing the evolution toward a harmonised legislative framework.

Personal data

Defines and differentiates between types of data as defined by the GDPR, including personal, anonymous, pseudonymous and special categories.

Controllers and processors

Describes the roles and relationships of controllers and processors as defined by the GDPR.

Processing personal data

Defines data processing and GDPR processing principles, explains the application of the GDPR and outlines the legal grounds for processing personal data.

Data subject rights

Describes data subject rights, applications of rights, and controller and processor obligations as set out in the GDPR.

Information provision obligations

Explains controller obligations for providing information about data processing activities to data subjects and supervisory authorities as set out in the GDPR.

Cross-border data transfers

Outlines options and obligations under the GDPR for transferring data outside the European Economic Area, including adequacy decisions and appropriate safeguards and derogations.

Compliance considerations

Discusses the applications of European data protection laws, legal bases and compliance requirements for processing personal data in practice, including employers processing employee data, surveillance, direct marketing, and internet technology and communications.

Security of processing

Discusses considerations and duties of controllers and processors for ensuring security of personal data and GDPR specifications for providing notification of data breaches.

Accountability

Investigates accountability requirements, including data protection management systems, data protection impact assessments, data protection policies and the role of the data protection officer.

Supervision and enforcement

Describes the role, powers and procedures of supervisory authorities; the composition and tasks of the European Data Protection Board; the role of the European Data Protection Supervisor; and remedies, liabilities and penalties for noncompliance as set out in the GDPR.

Introduction to privacy program management

Identifies privacy program management responsibilities, and describes the role of accountability in privacy program management.

Privacy governance

Examines considerations for developing and implementing a privacy program, including the position of the privacy function within the organization, role of the DPO, program scope and charter, privacy strategy, support and ongoing involvement of key functions and privacy frameworks.

Applicable laws and regulations

Discusses the regulatory environment, common elements across jurisdictions and strategies for aligning compliance with organizational strategy.

Data assessments

Relates practical processes for creating and using data inventories/maps, gap analyses, privacy assessments, privacy impact assessments/data protection impact assessments and vendor assessments.

Policies

Describes common types of privacy-related policies, outlines components and offers strategies for implementation.

Data subject rights

Discusses operational considerations for communicating and ensuring data subject rights, including privacy notice, choice and consent, access and rectification, data portability, and erasure and the right to be forgotten.

Training and awareness

Outlines strategies for developing and implementing privacy training and awareness programs.

Protecting personal information

Examines a holistic approach to protecting personal information through privacy by design.

Data breach incident plans

Provides guidance on planning for and responding to a data security incident or breach.

Measuring, monitoring and auditing program performance

Relates common practices for monitoring, measuring, analyzing and auditing privacy program performance.
