

HCIA Routing & Switching

- **Formato do curso:** Presencial e Live Training
- **Preço:** 4500€
- **Duração:** 70 horas

With **HCIA certification**, you demonstrate a basic understanding of small and medium-sized networks, including general network technologies, and the ability to assist the design of small and medium-sized networks, and implement the designs using Huawei routing and switching devices.

This 10 day HCIA Routing & Switching course prepares you for the H12-211 exam.

Destinatários

- Those who wish to become a Huawei Certified ICT Associate.
- For those who possess basic IT skills, but lack knowledge of IP networks.

Pré-requisitos

- A working knowledge of IT technologies.

Objectivos

On completion of this program, the participants will be able to:

- Navigate and manage Huawei products through the virtual routing platform (VRP).
- Build efficient data switching environments through the management of switching products and manipulation of related (STP/RSTP) link layer protocols.
- Explain the principles of routing and configure (RIP/OSPF) routing protocols for implementation and support of effective enterprise network routing solutions.
- Establish solutions for enterprise network administration and management through application layer services including DHCP, FTP and Telnet.
- Establish a fundamental network capable of supporting basic communications.
- Enhance link layer performance through implementation of features and services including link aggregation, VLAN technologies and GVRP.
- Manage and support Wide Area Network communications over serial links for a range of technologies

including HDLC, PPP, PPPoE and Frame Relay.

- Apply Network Address Translation (NAT) solutions for private networks.
 - Provide effective IP security solutions using various security architectures including Access Control Lists (ACL), AAA, and IPSec with GRE support solutions.
 - Describe solutions for unified enterprise network management, including SNMP and Huawei eSight NMS technology solutions.
 - Establish truly business capable enterprise networks for real-world industries.
-

Programa

HCIA Routing&Switching Entry

- Establishing a Single Switched Network
- FTP Protocol Principles
- Rapid Spanning Tree Protocol
- RIP Static Route
- Basic Knowledge of TCP/IP
 - Introduction to Transmission Media
 - Ethernet framing
 - IP addressing
 - ICMP protocol
 - ARP protocol
 - Transport layer protocol
 - Data forwarding Scenario
- Basic Knowledge of IP Routing
- DHCP Protocol Principles
- Link State Routing with OSPF
- Introduction to the VRP
 - VRP Foundation
 - Navigating the CLI
 - File System Navigation and Management
 - VRP Operating system Image management
- Spanning Tree Protocol
- Telnet Protocol Principles

HCIA Routing&Switching Intermediate

- Advanced switching technologies
 - Link aggregation
 - VLAN Principle
 - VLAN Routing
- Ipv6 Application Service - DHCPv6
- Segment Routing basic principle
- IPv6 Routing Technologies

- Introducing IPv6 Networks
- Principles and Configuration of PPPoE
- MPLS basic principle
- Introduction to Network Management
 - Simple Network Management Protocol
- Introduction to Access Control
 - Network address translation
 - Access control list
 - AAA
 - Securing Data with IPsec VPN
 - Generic Routing Encapsulation
- Principles and Configuration of HDLC and PPP
