Manage Red Hat OpenStack networking for performance tuning

Red Hat OpenStack Administration III: Networking & Foundations of NFV teaches network engineers, network operators, cloud operators, and cloud administrators how to manage and tune Red Hat® OpenStack Platform for network performance.

Students will learn how to manage the OpenStack networking service (Neutron) with network functions virtualization to enhance network performance. Students will configure distributed virtual routers, Open vSwitch with Data Plane Development Kit datapath, and IPv6 networking in OpenStack.

Students will also deploy software-defined networking with OpenDaylight.

This course can also help students to prepare for the Red Hat® Certified Engineer (RHCE®) in Red Hat OpenStack exam (EX310).

This offering is based on Red Hat OpenStack version 10.0 and Red Hat Enterprise Linux 7.4.
