

Windows Server 2019 for Hybrid Cloud

- **Formato do curso:** Presencial e Live Training
- **Preço:** 1530€
- **Duração:** 35 horas

As the cloud has become more popular, businesses have been faced with the choice of moving all their IT resources to the cloud or leaving them in the data center. Fortunately, the decision doesn't have to be all-or-nothing. Hybrid cloud computing means that you can leave critical data or legacy solutions on premises while moving other elements to the cloud. Windows Server 2019 offers significant benefits for the management of such a hybrid cloud infrastructure.

As the cloud has become more popular, businesses have been faced with the choice of moving all their IT resources to the cloud or leaving them in the data center. Fortunately, the decision doesn't have to be all-or-nothing. Hybrid cloud computing means that you can leave critical data or legacy solutions on premises while moving other elements to the cloud. Windows Server 2019 offers significant benefits for the management of such a hybrid cloud infrastructure.

In this course you will learn how to leverage Windows Server 2019 support for the hybrid cloud and improve the connections between on-premises servers and cloud services on Azure.

Programa

- Windows Server installation and administration
- Identity services
- Managing objects in AD DS
- Deploying and managing AD CS
- Network infrastructure services
- File servers and storage management
- Hyper-V virtualization and containers
- High availability and Disaster recovery
- Windows Server security
- Remote access and web services
- Remote Desktop Services

- Azure IaaS
 - Upgrade and migration
 - Server and performance monitoring
-

Ao concluir com aproveitamento esta formação, para além do Certificado de Frequência Rumos, receberás também um badge digital para partilhares com a tua rede profissional online. [Sabe mais sobre os badges digitais aqui.](#)
