

AZ-020: Microsoft Azure solutions for AWS developers

- **Formato do curso:** Presencial e Live Training
- **Localidade:** Porto
- **Data:** 01 Mar. 2021 a 03 Mar. 2021
- **Preço:** 1220€
- **Horário:** Laboral - das 9h00 às 17h00
- **Duração:** 21 horas

This is a three-day course designed to teach AWS (Amazon Web Services) developers how to prepare end-to-end solutions in Microsoft Azure.

In this Microsoft Azure solutions for AWS developers course you will construct Azure App Service Web App solutions and Azure Functions, use blob or Cosmos DB storage in solutions, implement secure cloud solutions that include user authentication and authorization, implement API management, and develop event- and message-based solutions, and monitor, troubleshoot, and optimize your Azure solutions.

You will learn how developers use Azure services, with additional focus on features and tasks that differ from AWS, and what that means for you as you develop applications that will be hosted by using Azure services.

Destinatários

Students in this course are experienced AWS developers interested in Azure development.

Pré-requisitos

Students should have 1-2 years professional development experience and experience with AWS. They must be able to program in an Azure Supported Language.

Programa

Create Azure App Service Web Apps

- Azure App Service core concepts

- Creating an Azure App Service Web App
- Configuring and Monitoring App Service apps
- Scaling App Service apps
- Azure App Service staging environments

Implement Azure functions

- Azure Functions overview
- Developing Azure Functions
- Implement Durable Functions

Develop solutions that use blob storage

- Azure Blob storage core concepts
- Managing the Azure Blob storage lifecycle
- Working with Azure Blob storage
- Create an Azure Resource Manager Template

Develop solutions that use Cosmos DB storage

- Azure Cosmos DB overview
- Azure Cosmos DB data structure
- Working with Azure Cosmos DB resources and data
- Create and deploy ARM templates

Create and deploy Azure Resource Manager (ARM) templates

- Create and deploy ARM templates

Implement user authentication and authorization

- Implementing Microsoft identity platform
- Implement Microsoft Authentication Library
- Secure app configuration data by using Azure App Configuration

Implement secure cloud solutions

- Manage keys, secrets, and certificates by using the KeyVault API
- Implement Managed Identities for Azure resources
- Secure app configuration data by using Azure App Configuration

Implement API Management

- Implement API Management
- Defining policies for APIs
- Securing your APIs

Develop event-based solutions

- Implement Azure Event Grid

- Implement Azure Event Hubs
- Implement Azure Notification Hub

Develop message-based solutions

- Implement solutions that use Azure Service Bus
- Implement solutions that use Azure Queue Storage queues

Monitor and optimize Azure solutions

- Applications of Azure Application Insights
- Instrument an app for monitoring
