

Designing Cisco Enterprise Wireless Networks (ENWLSD)

- **Formato do curso:** Presencial e Live Training
- **Localidade:** Lisboa
- **Data:** 08 Nov. 2021 a 12 Nov. 2021
- **Preço:** 3695€
- **Horário:** Laboral - das 9h00 às 17h00
- **Duração:** 35 horas

The **Designing Cisco Enterprise Wireless Networks** (ENWLSD) course gives you the knowledge you need to design Cisco® wireless networks. The course covers design specifics from scenario design concepts through the installation phase and into post-deployment validation.

This course, including the self-paced material, helps prepare you to take the exam, **Designing Cisco Enterprise Wireless Networks** (300-425 ENWLSD), which leads to the new **CCNP® Enterprise** and **Cisco Certified Specialist - Enterprise Wireless Design** certifications.

This course will help you:

- Gain the knowledge you need to plan advanced designs of Cisco wireless products
- Qualify for professional-level job roles in wireless networking
- Prepare for the **Designing Cisco Enterprise Wireless Networks** (300-425 ENWLSD) exam

Destinatários

Individuals interested in gaining the knowledge needed to plan advanced designs of Cisco Wireless Products:

- Consulting systems engineer
- Network administrator
- Network engineer
- Network manager
- Sales engineer
- Systems engineer
- Technical solutions architect
- Wireless design engineer
- Wireless engineer

Pré-requisitos

Before taking this course, you should have:

- General knowledge of networks
- General knowledge of wireless networks
- Routing and switching knowledge

The following Cisco courses can help you meet these prerequisites:

- [Implementing and Administering Cisco Solutions \(CCNA\)](#)
 - [Implementing and Operating Cisco Enterprise Network Core Technologies \(ENCOR\)](#)
-

Objetivos

After taking this course, you should be able to:

- Describe and implement a Cisco-recommended structured design methodology
 - Describe and implement industry standards, amendments, certifications, and Requests For Comments (RFCs)
 - Describe and implement Cisco enhanced wireless features
 - Describe and implement the wireless design process
 - Describe and implement specific vertical designs
 - Describe and implement site survey processes
 - Describe and implement network validation processes
-

Metodologia

- Instructor-led training: 5 days in the classroom with hands-on lab practice
-

Programa

Describing and Implementing a Structured Wireless Design Methodology

- Importance of Planning Wireless Design with a Structured Methodology
- Cisco Structured Design Model
- Cisco Design Guides and Cisco Validated Designs for Wireless Networks
- Role of the Project Manager When Designing Wireless Networks

Describing and Implementing Industry Protocols and Standards

- Wireless Standards Bodies
- IEEE 802.11 Standard and Amendments
- WFA Certifications

- Relevant IETF Wireless RFCs
- Practice Activity

Describing and Implementing Cisco Enhanced Wireless Features

- Hardware and Software Choices for a Wireless Network Design
- Cisco Infrastructure Settings for Wireless Network Design
- Cisco Enhanced Wireless Features

Examining Cisco Mobility and Roaming

- Mobility and Intercontroller Mobility in a Wireless Network
- Optimize Client Roaming in a Wireless Network
- WGB and WGB Roaming in a Wireless Network

Describing and Implementing the Wireless Design Process

- Overview of Wireless Design Process
- Meet with the Customer to Discuss the Wireless Network Design
- Customer Information Gathering for a Wireless Network Design
- Design the Wireless Network
- Deployment of the Wireless Network
- Validation and Final Adjustments of the Wireless Network
- Wireless Network Design Project Documents and Deliverables

Describing and Implementing Specific Vertical Designs

- Designs for Wireless Applications
- Wireless Network Design Within the Campus
- Extend Wireless Networks to the Branch Sites

Examining Special Considerations in Advanced Wireless Designs

- High-Density Designs in Wireless Networks
- Introducing Location and CMX Concepts
- Design for Location
- FastLocate and HyperLocation
- Bridges and Mesh in a Wireless Network Design
- Redundancy and High Availability in a Wireless Network

Describing and Implementing the Site Survey Processes

- Site Survey Types
- Special Arrangements Needed for Site Surveys
- Safety Aspects to be Considered During Site Surveys
- Site Survey Tools in Cisco Prime Infrastructure
- Third-Party Site Survey Software and Hardware Tools

Describing and Implementing Wireless Network Validation Processes

- Post-installation Wireless Network Validation
- Making Post-installation Changes to a Wireless Network
- Wireless Network Handoff to the Customer
- Installation Report

Labs:

- Use Cisco Prime Infrastructure as a Design Tool
 - Create a Predictive Site Survey with Ekahau Pro
 - Perform a Live Site Survey Using AP on a Stick
 - Stimulate a Post-installation Network Validation Survey
-

Prossiga na sua certificação Cisco!

Este curso confere 40 créditos no programa Continuing Education da Cisco.

[Se procura revalidar a sua certificação Cisco, conheça o programa Continuing Education.](#) Como forma de incentivar os candidatos a manter, aumentar e a diversificar o seu conjunto de skills, a Cisco desenvolveu este Programa de Recertificação que oferece caminhos flexíveis para revalidar competências e certificações existentes.
