

## AZ-500: Microsoft Azure Security Technologies

- **Formato do curso:** Presencial e Live Training
- **Localidade:** Porto
- **Data:** 08 Fev. 2021 a 12 Fev. 2021
- **Preço:** 1430€
- **Promoção:** -29%  
Campanha 29 Anos Rumos: Garante a tua inscrição com 29% de desconto + Oferta de Exame. Só até 31 de janeiro.
- **Horário:** Laboral - das 9h30 às 17h30
- **Duração:** 28 horas

In this course students will gain the knowledge and skills needed to implement security controls, maintain the security posture, and identify and remediate vulnerabilities by using a variety of security tools in Microsoft Azure.

The course covers scripting and automation, virtualization, and cloud N-tier architecture.

### Pré-requisitos

Before attending this course, students must have knowledge equivalent to Microsoft Azure Administrator Associate

Students should have at least one year of hands-on experience securing Azure workloads and experience with security controls for workloads on Azure.

### Objectivos

After completing this course, students will be able to:

- Describe specialized data classifications on Azure
- Identify Azure data protection mechanisms
- Implement Azure data encryption methods
- Secure Internet protocols and how to implement them on Azure
- Describe Azure security services and features

# Programa

## Identity and Access

- Configure Azure Active Directory for Azure workloads and subscriptions
- Configure Azure AD Privileged Identity Management
- Configure security for an Azure subscription

## Platform Protection

- Understand cloud security
- Build a network
- Secure network
- Implement host security
- Implement platform security
- Implement subscription security

## Security Operations

- Configure security services
- Configure security policies by using Azure Security Center
- Manage security alerts
- Respond to and remediate security issues
- Create security baselines

## Data and applications

- Configure security policies to manage data
- Configure security for data infrastructure
- Configure encryption for data at rest
- Understand application security
- Implement security for application lifecycle
- Secure applications
- Configure and manage Azure Key Vault
