

Happy Techie Hour “CI & CD practices and how to implement them using Jenkins”

- **Formato do curso:** Webcast
- **Preço:** €
- **Duração:** 1,5 horas

Esta Happy Techie Hour é em Inglês

If you're new to Jenkins and need more guidance than just documentation, join expert engineer Alex Stan in this live webinar that will cover:

- A brief overview of Continuous Integration and Continuous Delivery practices and how they can be implemented using Jenkins.
- The main Jenkins functionality highlighting how easily it can be extended and integrated with other tools and services (GitHub, Maven etc.).
- A demo with different types of Jenkins jobs by creating a complete pipeline that simulates a production environment.

Realizada a 20 de outubro 2021

Formador: Alex Stan

Alex Stan is a DevOps Training Architect with more than 8 years of experience. He is an expert in building continuous integrations and delivery pipelines using different technologies like Jenkins, Docker, Kubernetes on different Linux environments.
