

## VMware Horizon 8: Infrastructure Administration

- **Formato do curso:** Presencial e Live Training
- **Localidade:** Live Training
- **Data:** 11 Jul. 2022 a 15 Jul. 2022
- **Preço:** 1180€
- **Horário:** Laboral - das 09h00 às 18h00
- **Duração:** 16 horas

This two-day, hands-on course gives you the skills to install and configure a virtual desktop infrastructure platform. This course builds your skills in **installing and configuring VMware Horizon®** through a combination of lecture and hands-on labs. You learn how to install and configure VMware Horizon® Connection Server™, VMware Unified Access Gateway™, how to configure a load balancer for use with Horizon, and how to establish Cloud Pod Architecture.

**Product Alignment:** VMware Horizon 8 V2006

VMware Horizon 8: Infrastructure Administration is the second half of a two-course requirement for the certification: VMware Certified Professional – Desktop and Mobility 2021 (VCP-DTM 2021). VMware Horizon 8: Skills for Virtual Desktop Management satisfies the first requirement.

The courses are also available as a single, bundled offering, VMware Horizon 8: Deploy and Manage, which meets the certification requirement on its own.

---

### Destinatários

Administrators and architects for VMware Horizon should enroll in this course. These individuals are responsible for the implementation, maintenance, and administration of an organization's end-user computing infrastructure.

---

### Pré-requisitos

Customers attending this course should have, at a minimum, the following VMware infrastructure skills:

- Use VMware vSphere® Web Client to view the state of virtual machines, datastores, and networks
- Open a virtual machine console on VMware vCenter Server® and access the guest operating system

- Create snapshots of virtual machines
- Configure guest customization specifications
- Modify virtual machine properties
- Convert a virtual machine into a template
- Deploy a virtual machine from a template

Attendees should also have the following Microsoft Windows system administration experience:

- Configure Active Directory services, including DNS, DHCP, and time synchronization
  - Restrict user activities by implementing Group Policy objects
  - Configure Windows systems to enable Remote Desktop Connections
  - Build an ODBC connection to an SQL Server database
- 

## Objetivos

By the end of the course, you should be able to meet the following objectives:

- Identify Horizon Connection Server installation, architecture, and requirements.
  - Describe the authentication and certification options for a Horizon environment
  - Recognize the integration process and benefits of VMware Workspace ONE® Access™ and Horizon 8
  - Discuss performance and scalability options available in Horizon 8
  - Describe different security options for the Horizon environment
- 

## Programa

### Course Introduction

- Introductions and course logistics
- Course objectives

### Horizon Connection Server

- Recognize VMware Horizon reference architecture
- Identify the Horizon Connection Server supported features
- Identify the recommended system requirements for Horizon Connection Server
- Configure Horizon event database
- Outline the steps for the initial configuration of Horizon Connection Server
- Discuss the ADAM database as a critical component of Horizon Connection Server installation

### VMware Horizon Authentication and Certificates

- Compare the authentication options that Horizon Connection Server supports
- Describe the Smartcard authentication options that Horizon Connection Server supports
- Outline the steps to create a Horizon administrator and custom roles
- Describe the roles available in a Horizon environment

- Explain the role that certificates play for Horizon Connection Server
- Install and configure certificates for Horizon Connection Server
- Install and configure True SSO in a Horizon environment

### **Workspace ONE Access & Virtual Application Management**

- Recognize the features and benefits of Workspace ONE Access
- Recognize the Workspace ONE Access console features
- Explain identity management in Workspace ONE Access
- Explain access management in Workspace ONE Access
- Describe the Workspace ONE Access directory integration
- Describe the Workspace ONE Access directory integration
- Deploy virtual applications with Workspace services

### **VMware Horizon Performance and Scalability**

- Describe the purpose of a replica connection server
- Explain how multiple Horizon Connection Server instances in a pod maintain synchronization
- Describe the 3D rendering options available in Horizon 8
- List the steps to configure graphics cards for use in a Horizon environment
- Configure a load balancer for use in a Horizon environment
- Explain Horizon Cloud Pod Architecture LDAP replication and VIPA
- Explain Horizon Cloud Pod Architecture scalability options

### **Managing VMware Horizon Security**

- Explain concepts relevant to secure Horizon connections
- Describe how to restrict Horizon connections.
- Discuss the benefits of using Unified Access Gateway
- List the two-factor authentication options that are supported by Unified Access Gateway
- List Unified Access Gateway firewall rules
- Describe the situation in which you might deploy Unified Access Gateway instances with one, two, or three network interfaces
